Your tool passport

Save a copy in your PDF app. Keep one record per actual shear.

01 Identify the exact tool

For a set, the selected SKU is a shared purchase reference, not a component serial.

Your tool ID

Maker and model

Nominal size

Cutting hand

Tool: cutter / thinner / texturiser

Listed edge term, if known

Tooth count / pattern, if applicable

Owner or current user

Selected purchase SKU

Tool serial, if present

Seller / order reference

Arrival date

Model care instructions: source / link

Storage place / protective case

02 Record its arrival condition

- [ ] Tool and written contents checked against the selected order.
- [ ] Tips, blades, pivot and any tooth line inspected in good light.
- [ ] Starting condition photographed before use or adjustment.
- [ ] Any mismatch or concern recorded and raised before use.

Starting condition, notes or concerns

Other tools in this purchase: their separate record IDs

Arrival guide: japanshears.com.au/blog/posts/shear-arrival-inspection/

Fill fields in a supporting PDF app; save your own copy. Print this page if form support is limited.

A useful service record

Describe what you observed. Keep this page with the passport and service receipt.

01 What changed?

Tool ID / passport reference

Date noticed

Symptom: changed cut or closing action

Location: heel / middle / tip / other

Started after: use / drop / service / unknown

Context: task, wet / dry hair and anything else observed

02 Prepare the information

- [ ] Routine cleaning and model-approved care already done: note below.
- [ ] Photos kept: both complete sides, tips, markings and intact pivot.
- [ ] A drop or visible damage reported before further client use.
- [ ] Service acceptance, address and packing instructions confirmed.

03 Agreed work and the return

Technician or service provider

Date sent / appointment date

Care already done, work agreed and edge / tooth design to retain

Return date, completed work and observations before regular use

Service preparation: japanshears.com.au/blog/posts/prep-for-sharpening/

Record observations. Follow the exact model's care directions and workplace hygiene procedure.
